

# Air-Pak High Flow Cartridges

New **High Flow** desiccant cartridges now available for *Air-Pak* and SFD Dryer systems. The new desiccant cartridges simply replace current four-pound cartridges increasing dryer performance and flow rates.

Complete dryer systems designed with **High Flow** desiccant cartridges also available making for an excellent choice when replacing an out dated or nonfunctioning refrigerant dryer.

**High Flow** option increases drying capacity delivering -40° F\* pressure dew point.

\*Pressure dew points vary based on system pressure and flow rates

**High Flow** desiccant cartridges offers:

- Efficient, easy to service desiccant air dryer system
- Max 70 CFM per cartridge
- An upgrade to current *Air-Pak* or SFD systems
- **High Flow** cartridges add only 5 additional inches to overall height
- Maintains pressure dew points up to -40° deg F\*
- Reduces operating and maintenance costs
- Ideal for applications:
  - Cement
  - Dust Collection Systems
  - Mining
  - Spray Foam
  - Manufacturing
  - Specialized Applications
